

How Are We Different?

Patient Navigator brings health care and life care together.

Other companies can help with a specific insurance problem or doctor's appointment. But a serious illness or a journey through aging affects all the parts of your life — family, friends, jobs, children, finances, and caregiving. Your navigator understands this and helps you to chart a course that will connect these moving pieces into a manageable plan. Your navigator solves problems for you so that you can eliminate stressful tasks that drain your energy. Your personal Patient Navigator is not only your medical mentor, coach and advocate but also a companion to share the progress and setbacks of your journey.

Advocacy and Care Management Services

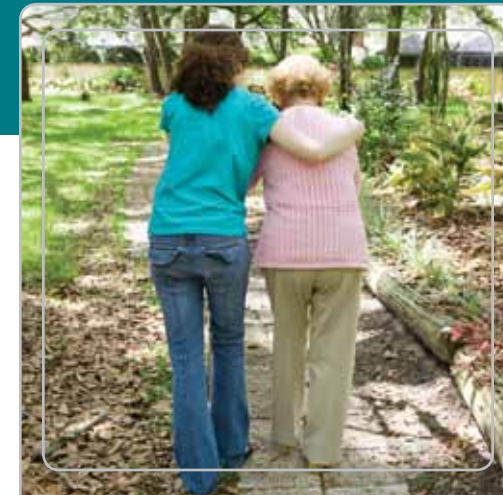

Guiding your journey through illness and aging.

www.PatientNavigator.com

Help is Here.

Your Navigator can:

- Coordinate care, treatment and communication among your medical team
- Provide detailed insurance claims assistance
- Track your medical paperwork to correct errors and to ensure you receive your full insurance benefits and coverage
- Tackle a hospital bureaucracy and oversee the care you are given
- Find and access appropriate social services
- Mobilize the resources your caregivers need to support your treatment and recovery
- Negotiate with an employer, health care provider or school to get the assistance you need
- Navigate the special medical, housing, and insurance needs of the elderly
- Develop options for complementary and integrative care

Our Goal

To coordinate care, to advocate for the patient's rights and needs, and to help families mobilize a support network, find solutions to everyday problems and assist caregivers.

*We are headquartered in Vienna, Virginia in the Washington, D.C. area

~ Research ~

Benefits of Working with Your Patient Navigator as a Research Partner

- Jump start your medical education
- Master the learning curve quickly and fully
- Focus on only the most accurate, current and relevant information; eliminate the risks of information overload
- Learn to speak the language of your disease
- Organize your records and paperwork

~ About Us ~

Patient Navigator is dedicated to working with patients and families as they journey through illness and aging.

We provide clients with information and research, we advocate on their behalf, we solve problems and we help them benefit from an integrative approach to their recovery.

Our founder, Elisabeth Schuler Russell, began her journey through the complexities of the American medical system in 1998 when her 2-year old was diagnosed with an inoperable brainstem tumor.

When her daughter recovered, Elisabeth committed herself to a new career using what she had learned as a patient advocate to help and teach others.

Patient Navigator is staffed with compassionate, competent, committed guides.
